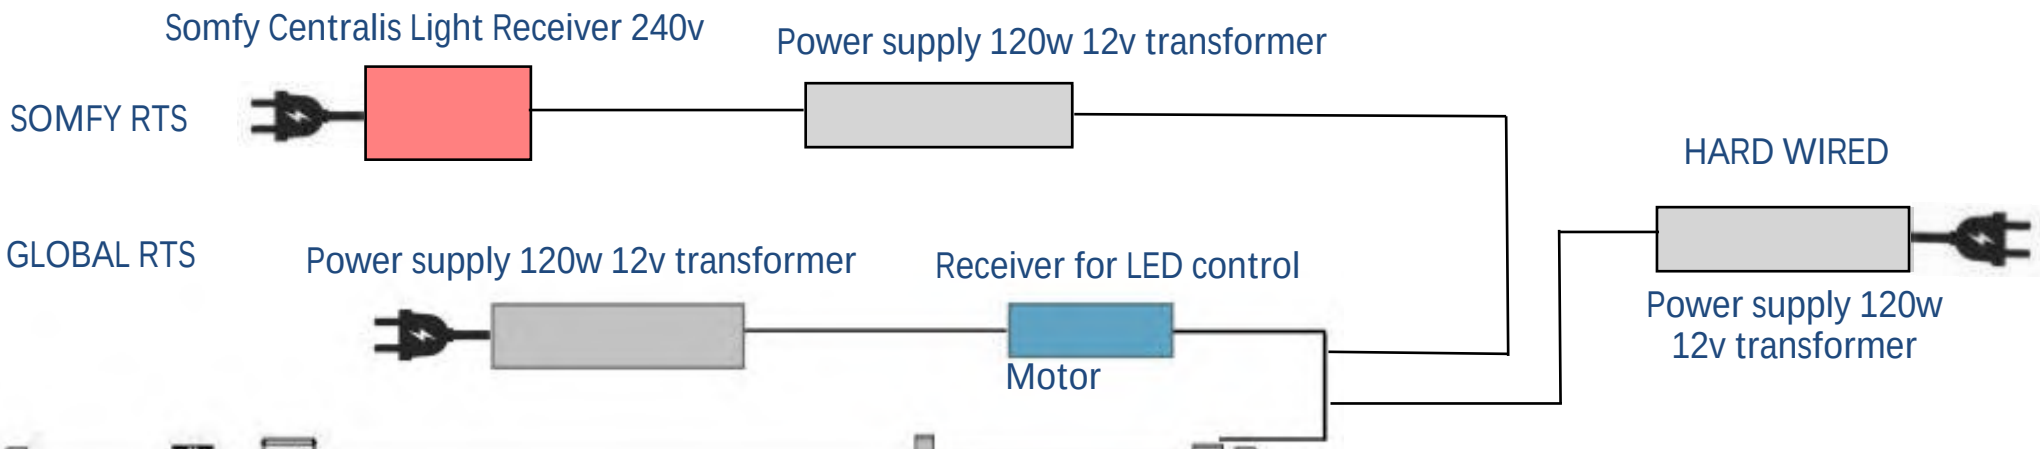
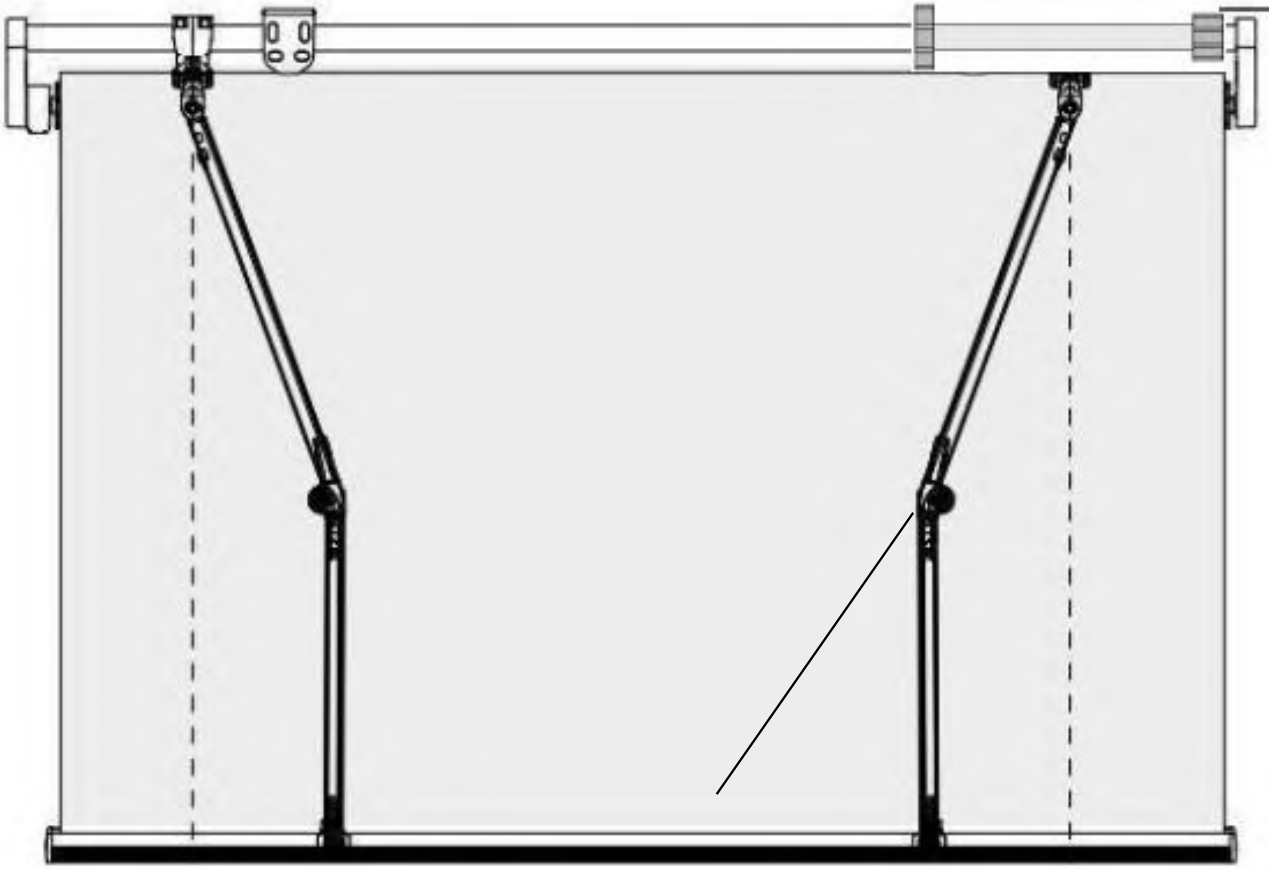
# DESIGNING WITH LIGHT

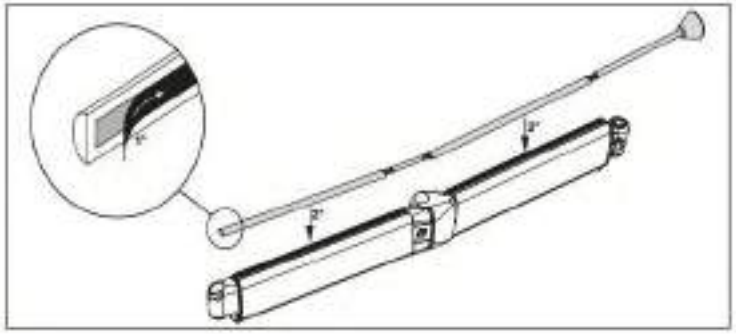
## CUTTING EDGE TECHNOLOGY AND PERFECT INTEGRATION IN THE ARM'S PROFILE

LED's are highly performing by their nature, both when offering comfort and in saving energy. Their flexibility in use, small dimensions, long life, lack of ultra-violet and infra-red rays emissions and high efficiency make it possible to install LED's on objects where light application was considered impossible before.

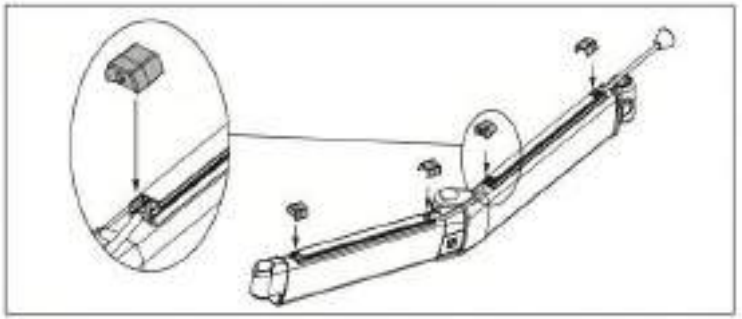




Spin arms with chain & integrated LED profile



Led strip inserted into integrated arm profile



PVC cover clicks into arm profile
